Force Main Condition Assessment**

**(Project No. 72403-2023-01)**

**ADDENDUM NO. 2**

December 29, 2025

This Addendum No. 2 shall become a part of the Request for Proposals. Please consider this document in preparation of your proposal.

**I. Clarification Regarding Contractor License Requirements**

Addendum No. 1 included a question about whether a contractor license is required to perform the work outlined in the RFP. The response stated that a General Engineering (Classification A) Contractor License in the State of California is required to perform the work.

**Clarification:** If the Prime Contractor is not self-performing work on sewer pipelines and appurtenances, such as temporary removal and reinstallation of pipe fittings, flanged coupling adapters, pipe spools, wyes, flow meters, valves, etc. for the purposes of accommodating the pig launching and retrieval, then they do not need to hold a Contractor License. Only the contractor or subcontractor performing such direct work on piping, adapters, fittings and related equipment would be required to hold a General Engineering (Classification A) license, or other applicable license that allows work on sanitary sewer piping, such as Class C-34.

This Addendum No. 2 shall be attached to and form a part of the Request for Proposals. The receipt of and examination of the addendum shall be acknowledged by the bidder / proposer below:
